DETAILED ACTION

Based on applicant's response to restriction requirement mailed 7/15/02; applicant elected Group I directed to claims 1-20 and 38-47 without traverse. It should be noted that claims 33-35 appear to be missing so the numbering of the claims might be misrepresented. Applicant

appear to be missing so the numbering of the claims might be misrepresented. Applicant

should clarify this in his/her response. Claims 21-37 are hereby withdrawn from examination.

Applicant should cancel the non-elected claims in response to this office action.

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do

not include the following reference sign(s) mentioned in the description: at page 13 reference

character "22"; page 15 reference character "72a-e". A proposed drawing correction or corrected

drawings are required in reply to the Office action to avoid abandonment of the application. The

objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: at page 16 line 26,

"102 provides the main riser support" appears to be incorrect; it appears that 102 is the main riser

not the main riser support. Page 17 line 4 has a similar problem. At page 17 lines 7-8, opposing

sections 120 and 126 and 122 and 124 appear to be mislabeled. Section 120 and 126 are not

opposing. Page 20 line 17, Figure 19 should be Figure 9. Appropriate correction is required.

Application/Control Number: 09/808,299 Page 3

Art Unit: 3673

3. The abstract of the disclosure is objected to because the abstract should be a single paragraph and the word "disclosed" should be omitted. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States. (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1-7, 10-15, 38-43 and 45-46 are rejected under 35 U.S.C. 102(b) as being anticipated by Arnott (US 5279368).

Arnott discloses a VIV mechanism to be applied on a cylindrical structure, the VIV mechanism comprising a cylindrical column with a reduced wall thickness (see Fig. 3). The cylindrical structure can be a riser, hull of a vessel (see col. 3 line 30+). The notches are formed at a plurality of different circumferential positions (see Fig. 1, 4).

Application/Control Number: 09/808,299

Art Unit: 3673

6. Claims 1-7, 10-19, 38-43 and 45-47 are rejected under 35 U.S.C. 102(e) as being anticipated by Wipo document (WO 01/77563).

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 8, 9 and 44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Arnott '368 or Wipo '563.

Arnott and Wipo '563 both disclose the invention substantially as claimed. However, they are both silent about the notches being shaped in a triangular/rectangular pattern. Notches having triangular/rectangular patterns are old and well known in the art. It would have been considered obvious to one of ordinary skill in the art to modify either Arnott or Wipo '563 by making the notches have a triangular/rectangular shape since such arrangement can give different VIV values.

Allowable Subject Matter

9. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 09/808,299 Page 5

Art Unit: 3673

10. As allowable subject matter has been indicated, applicant's reply must either comply with

all formal requirements or specifically traverse each requirement not complied with. See 37 CFR

1.111(b) and MPEP § 707.07(a).

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Sunil Singh whose telephone number is (703) 308-4024. The examiner can

normally be reached on Monday through Friday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Heather Shackelford, can be reached on (703) 308-2978. The fax phone number for the

organization where this application or proceeding is assigned is (703) 305-7687.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 308-2168.
